PREFACE

The user always looks for 'quality' of a product or service. 'Quality' is the user perception or image about the ability of the product or service to meet his requirements. The more a product or service fulfils his needs, better is the perception or image he has about the same. Building up quality means building up this perception, which, in the long term gets correlated to the actual performance of the product/service.

2. Inspection is an important tool to ensure quality. Apart from compliance of prescribed systems and procedures, inspection should also check the efficacy of internal control system in the Organization, and mitigation of risks inherent in it. Top management commitment is central to quality improvement and this has to be a key inspection outcome

3. At present, the inspection of Controllers offices is being carried out by CGDA's office on the basis of the Inspection Manual. The existing inspection is compliance oriented and does not look into the adequacy of the procedures themselves.. There is a need to re-orient the inspection methodology, so that it may indicate outcomes/deliverables by the Controllers to his customers.

4. Accordingly, the Inspection Questionnaire for Regional Controllers has been re-designed keeping in view the role and functions of the Auditee Controller. Part-I of the questionnaire covers the issues relating to Management Review and Part-II covers the points related to functions in the different Sections.

5. The purpose of the new system is to internalize inspection itself as a control mechanism and to ensure that the officers and staff of Auditee Controllers are fully involved in the activity of inspection. External inspection will focus mainly on the commitment of top management of the Controllers office towards continuous improvement.
6. Quality is not static but dynamic in nature, warranting continuous improvement. So, this Questionnaire too is not a static document. It would evolve with time as we aim towards sustained quality improvement. Since this is the first attempt, suggestions for further improvement are invited.
7. AT-Coord Section of HQrs. Office will be responsible for keeping the Inspection Questionnaire up-to-date with relevant/appropriate orders and Government of India instructions issued from time to time.

REORIENTATION OF INSPECTION BY HQRS OFFICE

At present inspection, by CGDA HQrs Office of different DAD offices at various levels (Referred to as "Controllers" hereafter) is being done on the basis of the HQrs Inspection Manuals. Contents of these are not known to the organization inspected. The observations of the inspection are thereafter allowed to remain correspondence for years together sometimes, defeating the very purpose of inspection. Since the inspection reports are voluminous, they are acted by lower or middle management at Controllers level, adequate

managerial attention is often found wanting. Inspections are also focused on compliance audit i.e. compliance of the procedures laid down from time to time. In changing scenario this approach is no longer sufficient. It is also necessary to audit the effectiveness of the procedures themselves and uncover the gaps/risks.

2. With a view to streamline the inspection, the following instructions are issued for compliance.

2.1 OBJECTIVE OF THE INSPECTION: The objective of the inspection (also referred to as “Quality Audit”) of offices by HQs is:-

(a) to see whether the procedures running within the organization are necessary and sufficient to de-risk the organizational tasks (adequacy audit),

(b) to ensure that procedures as prescribed are actually implemented. This is to be done by the checking records for evidence quality checks performed thereon (Compliance audit).

(c) to ascertain the degree of commitment of the top management towards not only compliance but also continual improvement.

3. The following steps may be taken to address the above objectives:-

3.1 Our inspection manual for each organization type has to be converted into Question and Answer format. Some additional questions also need to be framed bringing out the areas of risk if any, that are not covered by the existing procedures. This will ensure and will enable us to tighten the procedures. Also unnecessary procedures need to be eliminated from time to time. These additional questions are required to introduce adequacy audit in the inspection.

3.2 The inspection manual prepared as above will be circulated to all PCsDA/CsDA/PIFAs/IFAs offices. The JCDA or in his absence, another IDAS officer will be nominated as the Quality Manager in each office. He/She shall formulate internal inspection schedules based on peer audit. For these 3 or more teams from amongst the staff of different sections would be formed for conducting quality audit, headed by an SAO/GO level officer. For example, if X,Y and Z are Quality Audit groups, then X may inspect sections pertaining of Y. Y will inspect sections of Z and Z section may do inspection for X. Typically the inspection may be done on quarterly basis but frequency can be reduced for well-compliant sections and increased for sections having poor compliance levels.

3.3 Un-resolved points of these quality inspections will be put up to the Apex “Management Committee” for review. The Management Committee would be formed by Head of the organization. Quality Control officer would be Ex-officio Secretary and other members would be nominated by the Head of the organization. The following are the mandatory agenda points for discussion in the management review committee:-

3.3.1 Results of inspection carried out resolution of issues brought out therein.

3.3.2 Customer satisfaction and feed back based on question & answer response, the number, type of complaints received during the period and those resolved.

3.3.3 “Corrective” action points. Corrective action means only correction of objected issues but also to ensure that these do not recur.

3.3.4 Preventive Management issues: These arise from experiences from other offices and their prevention in the office in question.

4. HQrs Office inspection would constitute:

4.1 Through check of the management review committee records supplemented by interviews with top and middle management to assess management commitment.

4.2 Check of the conformity and adequacy audits conducted by the Internal Quality Control.

5. Conduct of Quality audit/inspection:

5.1 There would be an opening meeting where ground rules would be explained by the inspecting authority and necessary liaison work in order to ensure prompt production of document and travel/visit of inspecting groups within the organization, will be tied up. The method of inspection would be clearly explained to the auditee.

5.2 After the opening meeting the actual inspection will proceed. In this inspection the aim is to ensure action on deviant point rather than listing of objections and observation. The points found during the inspection should mostly be settled during the inspection.

5.3 The closing meeting would be held at the end of the inspection wherein all concerned from inspected organization management would be present. In this, un-resolved points shall be read out by the inspecting authority for formal follow up and remedial action by the inspected organization. This is not an occasion for settlement of observations/objections.

6. Wherever the number of observations exceeds 10 and the organization will be declared as unsatisfactory and would be liable for more frequent future inspections. Where the compliance result is very good, inspection may be done less frequently.

7. Future inspections where scheduled would be done soon after the first quality audit being conducted by the concerned office. The results of such audited may be given tabulated against each of the questions of the inspection drill, after review by the Head of the organization personally. The HQrs inspection results will also be recorded in the next column against the question.
